### PROFESSIONAL SUMMARY

A results-driven Software Developer with 5 years of experience in designing and building innovative mobile and web applications. Skilled in front-end development using React.js, Vue.js, Next.js, React Native, and Flutter, and proficient in back-end technologies such as Express.js, Node.js, MySQL, Firebase, AWS, and MongoDB.

In my role as a Senior Software Developer at UrbanEats, a cloud kitchen food delivery company serving over 15,000 users, I led the development of a robust web application using Vue.js to enhance the user experience and streamline business operations.

I also contributed to the Oil and Gas industry with New Cross, where I played a key role in digitizing oil and gas volume data at drainage points and building real-time analytical dashboards using React.js to help management track performance and operational efficiency.

Additionally, I have worked in the Fintech industry, where I led the frontend team in creating dynamic user interfaces and optimizing financial applications using React.js. My expertise in both mobile and web development, combined with my leadership experience, enables me to build scalable, user-centric solutions that drive business growth.

I am passionate about delivering high-quality solutions in fast-paced environments and continually expanding my technical skillset to stay ahead of industry trends.

### EXPERIENCE

#### Urban Eats - Lead Software Developer (Web and Mobile)

June 2023 - Present

- Scaled 90% of web and mobile application queries and data downloads which reduced database usage cost from £400 to £30 monthly average
- Developed and maintained software with over 15,000 users and achieved 85% customer satisfaction with provided analytics data. Designed several reusable components in Vue.js which reduced production time by 2 months
- Implemented delivery management system that manages best route for order delivery and grouped locations based on proximity which reduced delivery cost and improve delivery speed
- Developed Map polygons that helps manage range of possible delivery locations with possibility to be edited when needed

#### New Cross Pan Ocean - Software Developer

June 2024 - Dec 2024

- Led the design and implementation of a system to manage oil and gas volume capture, well testing, MER tests, and FG/SG surveys, significantly improving data accuracy and process efficiency reducing manual data entry by 90%.
- Automated data collection, analysis, and reporting processes, reducing manual work by 40% and increasing data processing speed by 30%.
- Developed dashboards and reporting tools to enhance decision-making for Petrol Engineers and Management.
- Conducted MER and FG/SG testing, providing valuable insights that optimized reservoir performance and production forecasting.

#### ReachAfrika - Senior Frontend Developer

Oct 2022 - Nov 2024

- Developed and maintained design systems and UI component libraries to enhance reusability, and collaborative coding and also reduced development time by 2 hours daily
- Developed user interfaces, integrated third-party software components, and tested the program for performance optimization
- Conducted code reviews and provided feedback to other developers to ensure high-quality code
- Mentored junior frontend developers on the team on React.js best practices
- Worked with designers to ensure that the website's UI/UX design met the needs of the target audience

#### Quantum Analytics - Frontend Developer

Nov 2022 - Aug 2023

- Implemented payment gate on the website which drove 70% of payment traffic to the platform and increased revenue by 75%
- Improved user experience by implementing region/country-specific content to users(students)
- Worked well with different developers to address challenges and solve problems **collaboratively**

## Tourbounty - Frontend Developer

Jun 2020 - Jul 2022

- Developed a responsive website UI using HTML, CSS, and JavaScript that reduced overall page load speed by 15%
- Worked closely with cross-functional teams to deliver projects on time and within budget
- Achieved web snap scroll (Tiktok, YouTube shorts) easing user experiences to view users' feed
- Collaborated with designers to implement UI/UX design into functional web pages

## Education

Oct 2018 - Aug 2022

**Caleb University, Lagos Nigeria**- *Bsc. Computer Science*

- Graduated top 10 of 158 students with a 4.38 CGPA out of 5 attainable
- Helped tutorials for students who had problems with programming

## Skills

**Languages:** Javascript, Typescript, Nodejs, Java,

**Frameworks:** React, Vue, Express, Nextjs, React Native, Flutter

**Technologies:** Firebase, AWS, Netlify, Vercel, Apache, MongoDB
